How long did it take to prepare this survey component?									
				<input type="text" value="22"/>	hours				

Reason:	The University increased on-campus housing scholarships, which resulted in an overall increase in students living in the residence hall. Some of athletics has also encouraged its students to take advantage of these scholarships, which would result in a decrease in students living off campus. The larger differences is also a reflection of an 8% decrease in first time degree-seeking students coming from the St. Louis Metropolitan area.			
Screen Entry	The average amount of grant and scholarship aid from the federal government, state/local government, or the institution awarded to Group 4 students for this income level is smaller than expected in comparison with the other income levels. Please check the values entered for the number of these students who were awarded any Title IV aid (Col. 1) and the total amount of grant or scholarship aid awarded to them (Col. 3) and correct your data or explain the discrepancy. (Error #7317)	Explanation	Yes	
Reason:	The most significant difference in the aid awarded to students in 02b versus 02c is in the form of housing scholarships. More students in 02c qualified for and were offered housing scholarships than students in 02b. When we removed housing scholarships from the calculations, this anomaly disappears.			
Screen Entry	The total amount of grant or scholarship aid awarded to Group 4 students from the federal government, state/local government, or the institution across all income levels (2,755,237) is outside of the expected range of between 1,471,343 and 2,452,237 based on the prior year value. Please fix your data or explain the discrepancy. (Error #7332)	Explanation	Yes	
Reason:	Increase in merit scholarship eligibility, increase in housing scholarships and need-based grant, addition of Gear Up and Opportunity Scholars 7)
